- MYSQL

## Education Background

● University of Makati

July 2017 - July 2021

Bachelor of Science In Information Technology and Service Management

## Professional Experience

### Front End Developer at Xurpas Inc.

**May 2022 – March 2023**

- Angular Developer in the LMX team, actively contributing to Agile methodology-based sprint task management.
- Demonstrated expertise in analyzing acceptance criteria, aligning them with user stories, and driving innovative system feature development.
- Proactively engaged in daily bug fixing and played a vital role in meetings for system enhancement.
- Deployed to Misorobotics, utilizing React.js and Agile methodology to deliver impactful solutions.
- Contributed to the development of Memachat app, employing React.js, Redux Toolkit, and NestJS for building a robust CMS within an Agile framework.
- Successfully deployed to Playfriends, leveraging Next.js as the front-end and back-end framework, ensuring efficient development using Agile methodology.
- Involved in the revamp of Lexi, utilizing Next.js, Electron.js, and MongoDB for the back-end, while adhering to Agile methodology.
- Actively participated in research and development initiatives for Solidity, focusing on creating Web3 and blockchain projects to drive technological advancement.

### Mobile Developer Intern at NOAH BUSINESS APPLICATION

**June 2021 – May 2022**

- React Native Developer within the Research and Development team, serving as the sole expert in the company
- Maintained and built a well-structured, clean codebase with standardized functions and design principles
- Facilitated future collaboration and maintained consistent quality for mobile development within the organization
- Integrated mobile APIs to establish seamless connectivity between mobile platforms and the central database
- Created comprehensive documentation encompassing the development process, key functions, and codebase for knowledge transfer and reference purposes

### Full Stack Developer Intern at NOAH BUSINESS APPLICATION

**February 2021 – June 2021**

During my intern as a Full Stack Developer Intern, I actively contributed to a Research and Development team, focusing on developing a robust web portal seamlessly integrated with a dynamic database capable of handling diverse requests and functions. Additionally, I successfully designed and developed a mobile app utilizing React Native, incorporating unique features for enhanced usability. A key aspect of my work was ensuring comprehensive documentation, providing valuable resources for the company's future endeavors.

## Freelance Experience

### Red Sky Digital Co,. Ltd.

- Designed and executed various tasks for Agoda, showcasing a strong sense of creativity and attention to detail.
- Demonstrated proficiency in WordPress, contributing to website development and maintenance.
- Successfully built EquitySwarm using React, showcasing expertise in front-end development and delivering a high-quality user experience.

### Outposter

- Assisted in the maintenance and upkeep of a real estate business website built in REX CMS, ensuring smooth operation and user experience.
- Successfully developed the Hodge Social website, showcasing proficiency in web development and delivering a dynamic online presence.
- Designed a website based on the Figma design tool, translating visual concepts into fully functional and visually captivating web pages.

### SimplFulfillment

- Independently continued and expanded upon an existing project, utilizing Next.js as the framework of choice, ensuring smooth transitions and seamless development.
- Effectively addressed and resolved issues on both the admin and client ends, enhancing overall functionality and user satisfaction.
- Leveraged Prisma for efficient backend operations and streamlined data management.
- Spearheaded a comprehensive app redesign, combining creativity and UX/UI principles to deliver an intuitive and visually appealing user experience.

### Sibs

- Building a social bartering system utilizing React Native, demonstrating expertise in mobile app development.
- Utilizing Firebase as the database technology, ensuring efficient and reliable data management for the social bartering system.
- Implementing Agile methodology to drive development and ensure iterative progress and continuous improvement.
- Working within a fast-paced and medium-scale team environment to deliver the social bartering system effectively.

## Bender Development LLC

I Served As A Freelance Developer For Matthew Bender At Ironfence Company. My Responsibilities Included Transforming An Existing Static Website, Originally Built With Vanilla JavaScript And JQuery, Into A Dynamic Next.Js Application With A PHP Backend. Additionally, I Developed A Content Management System (CMS) Web Application And A Mobile Application For The Disconnector Golf App, Where PHP Served As The Backend Technology.

## Casting Call Club LLC

As A Full-Stack Developer, I Was Responsible For Crafting A Website Known As 'Recdeer,' Which Drew Inspiration From Senja.Io. This Endeavor Involved The Utilization Of React For The Front-End And Ruby On Rails For The Back-End.

## Impala Services Inc

I Served As The Initial Front-End Developer Tasked With Modernizing An Established Application Known As 'Pergamon Labs,' Specializing In Label And Blueprint Production For Various Products. In This Capacity, I Successfully Migrated The Application To Next.Js While Maintaining The Existing PHP Backend And Integrating Localization With Next-I18. Moreover, I'm Proud To Mention That Due To My Contributions And Performance, The Company Has Plans To Promote Me To The Position Of Senior Front-End Developer After Six Months. In This Elevated Role, I Will Be Responsible For Leading A Team Of Frontend Developers, Further Advancing My Career And Responsibilities Within The Organization.

## Ashtree Block Ventures LLC

I Became A Member Of A Medium-Sized Team That Employed Agile Methodologies. Within This Team, I Worked On The Development Of 'Pecado Wallet,' A Digital Wallet That Seamlessly Integrates With Web3 Technology. My Responsibilities Included Crafting Features And Tokens Within The Web3 Environment, Utilizing Solidity For The Backend Logic And Next.Js For The Frontend.

## Mango Dream

I Was Responsible For Building An E-Commerce Platform That Seamlessly Integrated With Major Marketplaces Such As EBay, Amazon, And Square. This Platform Enabled Resellers To Efficiently Market And Sell Products. The Development Stack Included React For The Frontend And Node.Js With Express For The Backend. The Project Was Organized Into Two-Week Sprints To Ensure A Structured And Efficient Development Process.

## Autopilot

In 2023, As A Full Stack Developer | Mobile Developer At Autopilot In The US, I Developed A CRM Platform For Outsourcing Services, Managing Both Web And Mobile Versions With Next.Js And Supabase. My Role Involved Creating Scalable, Efficient Solutions To Enhance Operational Workflows And User Experiences. Employing Agile Methodologies, I Ensured Seamless Project Execution, Contributing To Autopilot's Innovation In CRM And Outsourcing Services

## Decenternet

A Full Stack Developer | Mobile Developer At Decenternet In Korea, I Led The Integration Of AI And Blockchain Technologies Into Our Web And Mobile Platforms. I Designed Applications Utilizing OpenAI's APIs And Developed Secure Blockchain Solutions, Employing React For Front-End And Node.Js With Express For The Backend. My Responsibilities Extended To Deploying Applications Using Nginx, Ensuring Scalability And Security Across Environments. Through Agile Methodologies, I Managed Project Deliverables, Fostering Innovation And Positioning Decenternet As A Leader In Cutting-Edge Technology Integration.

## Long View Labs

Worked as a FullStack Mobile Developer, focusing on building and deploying scalable mobile applications using Next.js and React Native. Integrated Firebase for real-time database functionality, authentication, and cloud storage, ensuring seamless performance and user experience. Collaborated on end-to-end development processes, including UI/UX design implementation, API integrations, and testing. Successfully deployed applications to both Google Play Store and Apple App Store, adhering to platform-specific guidelines and ensuring cross-platform compatibility.

## Volatility

Worked as a FullStack Developer on a cutting-edge trading platform, delivering seamless functionality and user experience for financial market applications. Utilized modern web technologies, including React.js, Next.js, and Node.js, to develop responsive front-end interfaces and robust back-end services. Designed and implemented secure API integrations for real-time data updates and transaction processing. Collaborated closely with stakeholders to ensure compliance with financial regulations and to tailor solutions to user requirements. Focused on optimizing application performance, maintaining code quality, and deploying scalable solutions to support high user traffic. Played a critical role in delivering timely updates and new features for the platform.

## Compound

Worked as a FullStack Mobile Developer on the Compound app, a UK-based pension platform designed to simplify pension management for users. Leveraged AWS for scalable cloud services, ensuring secure and reliable backend infrastructure. Built and maintained mobile applications using React Native, delivering a seamless user experience across both iOS and Android platforms. Collaborated with cross-functional teams to develop intuitive user interfaces, implement API integrations, and optimize performance. Focused on ensuring data security and compliance with UK pension regulations. Played a key role in deploying new features and enhancing the app's functionality to meet evolving user needs.
